I am a highly skilled software developer and data analyst. I have a deep understanding of a variety of programming languages. My main areas of expertise include web development and data analysis. I have worked on many exciting projects showcasing my diverse skills and abilities. These projects include full-stack applications, data stories, and research papers, which can be viewed on my website (linked above). I am a creative and analytical thinker, a strong communicator and team player. I am confident that my unique combination of technical expertise and soft skills make me an asset to any team.
